Junior Web Developer

Description

As a Junior Web Developer at Tarheel Media, you will work closely with our experienced development team to assist in the design, development, and maintenance of websites and web applications for our clients. This role offers an exciting opportunity to gain hands-on experience in web development while working on a variety of projects across different industries.

If you're a passionate and driven individual with a desire to kick-start your career in web development, we want to hear from you! Join our team at Tarheel Media and embark on an exciting journey to create impactful digital solutions for our clients. Apply today by submitting your resume and portfolio showcasing your relevant projects and experiences. We look forward to welcoming you to our team!

Skills
Required Skills:

1. **Proficiency in Front-End Technologies:** Strong understanding of HTML, CSS, and JavaScript is essential for creating responsive and visually appealing websites and web applications.
2. **Responsive Web Design:** Ability to implement responsive web design principles to ensure optimal user experience across various devices and screen sizes.
3. **Front-End Frameworks/Libraries:** Familiarity with front-end frameworks and libraries such as Bootstrap, jQuery, or React is beneficial for streamlining development and enhancing functionality.
4. **Coding Standards and Best Practices:** Knowledge of coding standards, best practices, and industry conventions to write clean, well-structured, and maintainable code.
5. **Debugging and Testing:** Proficiency in debugging and testing techniques to identify and resolve issues, ensuring functionality and performance across different browsers and devices.
6. **Version Control Systems:** Experience with version control systems like Git for collaborative development, code management, and version tracking.
7. **Problem-Solving Skills:** Strong problem-solving abilities to troubleshoot technical issues, implement solutions, and overcome challenges encountered during the development process.
8. **Communication and Collaboration:** Effective communication skills and the ability to collaborate with cross-functional teams, including designers, project managers, and other developers, to achieve project objectives.
9. **Attention to Detail:** Keen attention to detail to ensure accuracy and precision in coding, design implementation, and project execution.
10. **Continuous Learning:** Passion for learning and staying updated on emerging trends, technologies, and best practices in web development to enhance skills and adapt to evolving industry standards.

Preferred Skills (Not Required but Beneficial):

1. **CMS Platforms:** Familiarity with content management systems (CMS) such

as WordPress for website development and customization.

2. **Back-End Development Concepts:** Basic understanding of back-end development concepts, including server-side languages (e.g., PHP), databases (e.g., MySQL), and web server configurations.
3. **Graphic Design Skills:** Basic knowledge of graphic design principles and tools (e.g., Adobe Photoshop, Illustrator) to collaborate effectively with designers and implement visual elements.
4. **User Experience (UX) Design:** Understanding of UX design principles and methodologies to create intuitive and user-friendly interfaces that enhance usability and accessibility.
5. **Project Management:** Basic understanding of project management concepts and methodologies to effectively collaborate with project managers, prioritize tasks, and meet project deadlines.
6. **Portfolio Development:** Ability to showcase previous projects and experiences through a portfolio demonstrating relevant skills, creativity, and problem-solving abilities.

Responsibilities

1. Collaborate with senior developers and project managers to understand project requirements and objectives.
2. Assist in the design and development of responsive websites and web applications using HTML, CSS, JavaScript, and other relevant technologies.
3. Implement user interface designs and layouts based on wireframes and mockups provided by the design team.
4. Write clean, well-structured, and efficient code while adhering to coding standards and best practices.
5. Conduct testing and debugging of web applications to ensure functionality and performance across various browsers and devices.
6. Assist in the integration of third-party APIs, plugins, and tools to enhance website functionality.
7. Stay updated on emerging trends, technologies, and best practices in web development to continuously improve skills and knowledge.
8. Collaborate with cross-functional teams, including designers, content creators, and marketers, to ensure cohesive and effective project execution.
9. Participate in code reviews, feedback sessions, and team meetings to contribute ideas and insights for project improvement and optimization.

Qualifications

1. Bachelor's degree in Computer Science, Information Technology, or a related field (or equivalent work experience).
2. Proficiency in HTML, CSS, and JavaScript, with a strong understanding of responsive web design principles.
3. Familiarity with front-end frameworks/libraries such as Bootstrap, jQuery, or React is a plus.
4. Basic knowledge of web development tools and technologies, including version control systems (e.g., Git), code editors, and browser developer tools.
5. Ability to work collaboratively in a team environment, communicate effectively, and take direction from senior developers and project managers.
6. Strong problem-solving skills and attention to detail, with a passion for learning and self-improvement.
7. Prior experience with CMS platforms (e.g., WordPress) and familiarity with back-end development concepts (e.g., PHP, MySQL) is desirable but not required.

Job Benefits

1. Competitive salary commensurate with experience.
2. Flexible remote work environment with opportunities for growth and advancement.
3. Exposure to a diverse range of projects and industries, providing valuable learning experiences.
4. Ongoing training and professional development opportunities to enhance skills and knowledge.
5. Collaborative and supportive team culture with a focus on creativity, innovation, and excellence.
